DIY MASSAGE BED

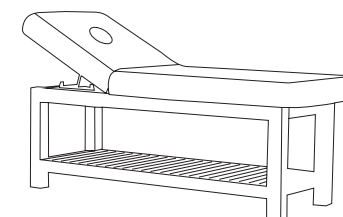

At Esthetica, we understand the challenges our international customers face with rising shipping costs. To combat this issue without compromising on quality, we're excited to introduce our new DIY Massage Bed—a game-changer for both cost efficiency and durability.

Unlike traditional massage tables that are shipped in dismantled form and require assembly using nuts and bolts, our DIY Massage Bed features a unique design focused on craftsmanship.

Using a tenon & mortise joint combined with wooden dowel pins, we've created a permanent, load-bearing structure that rivals solid wood massage beds in strength and stability.

This innovative joinery technique ensures the bed can support up to 250 kg of evenly distributed weight without any squeaking or wobbling, a common issue with bolt-based designs.

The result? A massage table that is exceptionally durable, silent during use, and aesthetically pleasing.
